Lisbon, Portugal,
Open to relocate

PROJECTS

MIKEFLIX

- Built a REST API with Node.js and Express, using Mongoose to interact with the MongoDB database.
- Tested the API endpoints with Postman, wrote clean and concise documentation, and deployed the API with Heroku.
- Created a single-page, responsive, front-end web application using React, following MVC design pattern where users can create accounts, browse a movie library and save their favorite movies.

MEET APP

- Developed a serverless progressive application (responsive, cross-platform, offline available) using React to display events from Google calendar API.
- Followed a test-driven development approach, translating user stories into scenarios for unit and integration testing (Jest), acceptance testing (Cucumber), and end-to-end testing (Puppeteer).
- Implemented serverless functions (AWS Lambda) to authenticate and authorize users (OAuth).

CRWN-CLOTHING

- Build an e-commerce application that allows users to select clothing items from a mix of item categories.
- Created the application using React, Redux, and the Stripe API for the handling of payments.
- Implemented storage, authentication and authorization through Firebase.

EXPERIENCE

CONSULTANT

Set2021 - Out2022

Deloitte Processes & Operations S.A.

Lisbon, Portugal

- Prepared monthly general ledger accounts reconciliations and analyses including cash and fixed assets.
- Supervised junior accountants on completion of month, quarter, and year-end close, including financial statements, account reconciliations, and preparation of various internal reports and tax returns.
- Ensured the quality and compliance of documentation and ensured that fiscal deadlines were met.

FINANCIAL CONTROLLER

Oct2018 - Set2021

LACS- Community of Creators

Lisbon, Portugal

- Assisted in implementing an ERP by gathering requirements and analysing key objectives which enabled the company to become evermore efficient in its daily processes.
- Effectively coached a junior team member by assisting him to develop software skills and handle day-to-day procedures with increasing levels of autonomy.
